Alarm Clock · Circadian Mode · Auto Brightness

Wake up to iLight and enhance your home.

A new generation of ultra-efficient, programmable wireless home lighting that you can control from anywhere with your smartphone or tablet.

16 Million Colours · 100 Shades of white

Get Intuitive

Control all your iLight LED Smart Downlights with the tap of a finger, from anywhere, anytime.

iLight gives you the power to instantly choose and enjoy smart, LED lighting with 16 million colours and 100 shades of white light.

Plus iLight LED Smart Downlights can be controlled from your existing wall switches; therefore no additional wiring required either.

Combine iLight LED Smart Downlights and Bulbs.

Apple Connect · Android Connect · Windows Connect · IFTTT Connect

Get Value

No costly home automation system to purchase, just iLight LED Smart Downlights, Airstream's Wi-Fi Bridge and FREE iLight App available on Apple, Android and Windows phones plus connect with other apps using IFTTT.

80% More Efficient · 40,000 Hours · Energy Star Ratings

Get Efficient

Long-lasting iLight LED Smart Downlights are the most efficient available.

iLight will add a lively splash of colour to your house while being kind to the environment - they are 80% more energy efficient than standard globes and last for up to 40,000 hours.

With a built-in internal temperature safety sensor, iLight LED Smart Downlights can be covered with insulation, delivering no loss of energy or your homes' energy star rating.

Colour Picker · Candle Effect · Relaxation Mode · Reading Mode · Special Effects

Get Creative

Whatever your mood or occasion, colour it with iLight LED Smart Downlights.

Whether you're dancing to Purple Rain or cooking Chicken Verde, you can set the perfect mood with iLight.

Music Mode · Alarm Clock · Holiday Mode · iSense Control · Circadian Mode

Get Innovative

More than just a LED Smart Downlight, iLight is living technology.

iLight fills your house with more than colour. It syncs with your music, links to your alarms, timers and alerts and helps regulate your body clock.

Why iLight LED Smart Downlights and Bulbs are the clever choice.

- **Inexpensive.** No expensive home-automation system required and pricing on par with standard LED lights.
- **Easy to install.** No additional wiring required. Uses standard light fittings and switch.
- **Easy to use.** Control from smart device or Smart Switches. Anywhere, anytime.
- **Intuitive.** Switches iLights off automatically via timer or sensor.
- **Scalable.** Install one iLight or many – Up to 128 iLights per system.
- **Flexible.** Both LED Smart Downlights and Bulbs available.
- **Grouping.** Users can group and ungroup iLights at anytime.
- **Fun & Relaxing.** iLight adds colour and shades of white to your home from anywhere, anytime.
- **Adds value.** iLight increases your home's value and enhances your lifestyle.
- **Connected.** iLights can be integrated with iZone climate control system and other living technology.
- **IFTTT.** Airstream is a www.IFTTT.com partner, which enables many other connectivity options.
